

Philosophy of

Village Kids Childcare Centre - Havelock North

Pukeko Team

Centre

We believe that each child is unique and will learn best when teachers and the environment affirm and support each child holistically. Our programme follows them principles and strands of Te Whariki, where each child's learning is extended, shared and celebrated.

We recognise and share our unique New Zealand dual culture and heritage and we value our joint partnership with parents, whanau and the wider community.

Paua

Our PAUA philosophy is unique to Village Kids. It incorporates several principles that ensure we work effectively as a team of teachers, parents, children and management.

It includes the beliefs that we should have fun and appreciate each other, that our attitude effects the work environment and that we need to pay attention to each other.

Pukeko Team

We believe that children should be free to develop at their own pace in their chosen activity.

We provide a safe, simulating and fun environment where children feel confident to explore, take risks, develop a sense of responsibility for themselves, a respect for others, and they are able achieve personal goals.
